**“Normativity and Arbitrariness.”**  
**Lisa Cassell, Dept. of Philosophy,**

relatively little attention. Namely: is Hume's distinction between 'simple' and 'complex' ideas/impressions intended to follow from the *phenomenology of our experience* or is it instead a *theoretical stipulation with specific explanatory or pragmatic aims*? If the former, then the critique found in *Investigations* 47 is devastating for Hume's theory, as 'experience itself' is compatible with many such ways of distinguishing 'simple' and 'complex' elements; but if the latter, then Hume may have anticipated the problem raised by Wittgenstein and would (perhaps) justify his theoretical stipulations on pragmatic grounds.

## 7. Friday, November 15, 2024, 3:00pm in CHB C133

**“Logic is Not Logic.”**

**Jean-Yves Beziau, Federal University of Rio de Janeiro, Brazilian Research Council and Brazilian Academy of Philosophy**

In this talk I will examine the very nature of logic by distinguishing between *Logic* as reasoning and *logic* as the science of reasoning. I will discuss the evolution of modern logic, the appearance of many different systems of logic, classical and non-classical, the distinction between logic and metalogic, and the development of universal logic as a general theory of logical systems.
